

9th Grade Math Placement

All incoming 9th grade students to Kingsburg High School will be placed in the appropriate math class using the following criteria:

- performance on a placement test
- classroom performance from the 8th grade math course
- teacher recommendation

The opportunity to retake the test will be offered to a minimal number of students whose score does not reflect past academic performance and where the parent or 8th grade teacher believes the child's placement is not appropriate. Please contact the counseling office to schedule retaking the placement test.

Within the first month of the school year, there will be another assessment given to ensure accurate placement of 9th grade students.
